About Us

Bemas technologies is a full-service IT Solutions Provider and consulting firm specializing in the development, management of innovative tech products such as voice solutions, bulk sms and messaging, app, software development and many others. With over 10 years' experience working across various industries, we have been able to build a diversified portfolio; ensuring that we are the perfect fit for your organisation to help scale and achieve your desired goals.

We have handled projects from products development to products support and management for services such as ride-hailing app, voice/SMS broadcast and automation, service portals and sale of smart products such as industrial internet of things (IIoT).

Our major aim is to help organisations fill in the position of technical and innovation support while they focus mainly on managing the overall operations of the business.

Vision & Mission

“To be the leading and globally competitive and recognized Nigerian Software design and consultancy company business.”

At BEMAS Technologies Limited, we value our customers, staff, ethics and environment. Our operation and activity is efficiently and effectively conducted without conflict and compromise.

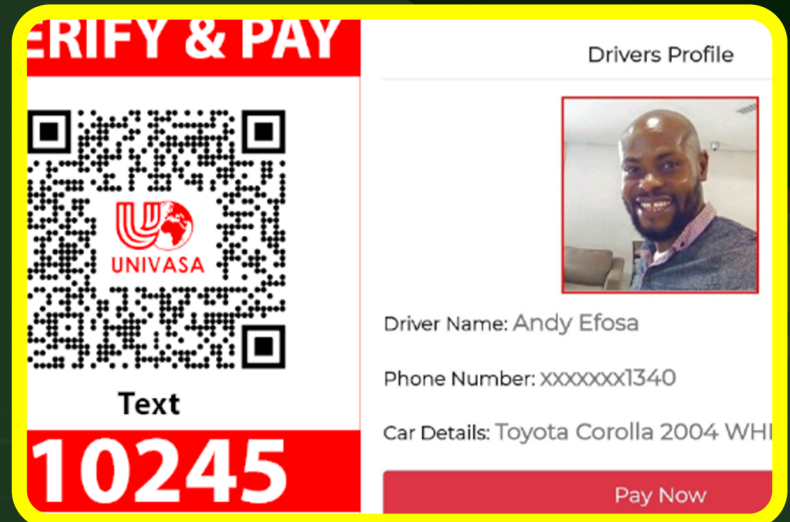

Services

Messaging (SMS):

Automated bulk SMS software to over a thousand receivers per minute. Can be used for marketing communications, critical alerts and information to a large audience.

Verify and Pay: The verify and pay initiative is aimed at reshaping the transport industry in Nigeria. It offers payment and security solutions to all players of the industry. With payment options such as card or USSD, we are migrating to a cashless system.

Ride hailing:

With over two years' experience in the e-hailing industry, we were able to manage, sustain and provide support to users of the platform. We can also boast of a large network of providers and users enough to sustain and stimulate the transport industry. This portal can also be deployed for interested new and existing players in the transport industry.
